Validation sprint

30-7-2026 سبتمبر ٣٠ - ٧ September 2026

BEFORE YOU LEAVE THE HOUSE

- ☐ Prototype pad, unbranded
one per session, plus a spare
- ☐ Three colouring media on the table
wax crayons, colored pencils, felt-tip markers
- ☐ Consent forms – signed BEFORE any child session
no consent, no session
- ☐ Timer, visible to you and not to the child
- ☐ This pack, with blank sheets for every booked session
- ☐ Incentive gift cards, and the receipt log
- ☐ A second identical sheet the child can keep

THE FOUR RULES

1. **Debrief the same day.** Fifteen minutes after each session, while the words are still exact. A session written up three days later has become an anecdote.
2. **Capture words, not scores.** The product page will be written out of the verbatim bank, not out of the draft copy.
3. **Never show and tell in the same breath.** You get one uncontaminated reveal per parent. Explain nothing until they have told you what it is.
4. **Record disconfirmation.** A sprint that produces only encouragement has failed – it means you led, and you find out in November at full production cost.

Qualified throughout: a parent living in Saudi Arabia, with at least one child aged 4-9, who has bought a physical children's product online in the last 6 months. **Do not loosen this to hit a sample size.**

نموذج موافقة ولي الأمر

جلسة تجربة مع طفل

أنت مدعو مع طفلك للمشاركة في جلسة قصيرة لتجربة نموذج أولي لمنتج نشاط للأطفال. الهدف هو معرفة كيف يستخدم الأطفال المنتج فعليًا، وما إذا كان مناسبًا لأعمارهم.

ما الذي سيحدث

- تستغرق الجلسة من ١٥ إلى ٢٠ دقيقة.
- يجرب طفلك النموذج ويلوّن كما يحب. لا يوجد صواب وخطأ، وليست اختبارًا لطفلك.
- نسجّل ملاحظات مكتوبة عن كيفية استخدامه: كم استمر، وهل احتاج مساعدة، وماذا قال.
- بعد الجلسة نسألك خمسة أسئلة قصيرة عمّا شاهدت.

حقوقك وحقوق طفلك

- المشاركة تطوعية بالكامل.** يمكنك الانسحاب في أي لحظة دون أن تذكر سببًا.
- نسأل طفلك مباشرة إن كان يرغب بالمشاركة. وإذا رفض أو أراد التوقف في أي وقت، نتوقف فورًا.
- يمكنك طلب حذف بياناتكم في أي وقت حتى ٣٠ سبتمبر ٢٠٢٦.
- الرفض لا يؤثر على أي شيء، ويبقى مبلغ المكافأة مستحقًا لك.

البيانات

- لا نجمع اسم طفلك الكامل ولا اسم مدرسته ولا أي بيانات تعريفية عنه.
- نُحفظ الملاحظات على جهاز واحد، ونُستخدم لتطوير المنتج فقط.
- نُحذف الملاحظات والتسجيلات بعد كتابة التقرير.** ولا تُضاف إلى أي قائمة تسويقية.
- لا نشارك بياناتكم مع أي جهة أخرى.

التصوير – اختياري تمامًا

الموافقة على التصوير ليست شرطًا للمشاركة. الرفض لا يغيّر شيئًا.

☐ أوافق على تصوير يدي طفلي والورقة فقط، دون وجهه. لأغراض البحث الداخلي.

☐ لا أوافق على أي تصوير.

استخدام أي صورة في التسويق يتطلب إذنًا منفصلاً ومكتوبًا لتلك الحالة تحديدًا. لن يُستخدم وجه طفلك أو اسمه في أي مادة تسويقية إطلاقًا.

الموافقة

☐ قرأت ما سبق وفهمته، وأوافق على مشاركة طفلي.

Parental consent

Child prototype session

You and your child are invited to take part in a short session testing an early prototype of a children's activity product. The purpose is to learn how children actually use it, and whether it suits their age.

WHAT WILL HAPPEN

- The session takes 15-20 minutes.
- Your child tries the prototype and colours however they like. There is no right or wrong, and this is not a test of your child.
- We take written notes on how they used it: how long, whether they needed help, and what they said.
- Afterwards we ask you five short questions about what you saw.

YOUR RIGHTS, AND YOUR CHILD'S

- **Taking part is entirely voluntary.** You may withdraw at any moment without giving a reason.
- We ask your child directly whether they want to take part. If they decline, or want to stop at any point, we stop immediately.
- You may ask us to delete your data at any time up to 30 September 2026.
- Declining changes nothing, and the incentive is still yours.

DATA

- We do not collect your child's full name, school, or any identifying details.
- Notes are kept on one device and used only to improve the product.
- **Notes and any recordings are deleted after the write-up,** and are never added to a marketing list.
- We do not share your data with anyone else.

PHOTOGRAPHY – ENTIRELY OPTIONAL

Consenting to photography is not a condition of taking part. Declining changes nothing.

- ☐ I consent to photographs of my child's hands and the page only, with no face, for internal research.
- ☐ I do not consent to any photography.

Any marketing use of an image requires separate written permission for that specific use. Your child's face and name will never appear in marketing material.

CONSENT

- ☐ I have read and understood the above, and I consent to my child taking part.

Parent / guardian name

Relationship to child

Child's age

Date

Signature

Contact (optional) - so you can request deletion later

Consent to record

Parent interview · موافقة على التسجيل

بالعربية

نودّ تسجيل صوت المقابلة فقط، حتى لا ننشغل بالكتابة أثناء حديثك.

- التسجيل صوتي فقط، بدون فيديو.
- يُستخدم لكتابة الملاحظات فقط، ثم يُحذف بعد كتابة التقرير.
- لا يُشارك مع أي جهة خارجية.
- يمكنك الرفض، وسنكتب الملاحظات يدويًا – لا فرق في المكافأة.
- يمكنك طلب إيقاف التسجيل في أي لحظة.

IN ENGLISH

We would like to record audio of the interview only, so we are not writing while you talk.

- Audio only – no video.
- Used only to write up notes, then **deleted after the write-up**.
- Never shared outside the project.
- You may decline and we will take notes by hand – the incentive is unaffected.
- You may ask us to stop recording at any moment.

- ☐ I consent to audio recording · أوافق على التسجيل الصوتي
- ☐ I do not consent – please take written notes · لا أوافق – يُرجى الكتابة يدويًا · وسنكتب الملاحظات يدويًا

Name · الاسم

Date · التاريخ

Signature · التوقيع

If the parent declines, note it and take notes by hand. A refusal must never affect the session or the incentive. Record the refusal on the capture sheet so the write-up knows why there is no audio.

DELETION LOG – FILL THIS IN WHEN YOU DELETE

The promise above is only worth making if you keep it. Record the date the recording and notes for this participant were actually deleted.

Participant ID

Recording deleted on

Deleted by

Screener

Every question, every time – never trust an earlier qualification

QUALIFY – ALL FOUR MUST PASS

S1	Do you live in Saudi Arabia? هل تقيم في المملكة العربية السعودية؟	Y / N	N → stop
S2	Do you have a child aged 4-9? هل لديك طفل بين ٤ و٩ سنوات؟	Y / N	N → stop
S3	In the last 6 months, have you bought a physical children's product online and had it delivered? خلال ٦ أشهر، هل اشتريت منتجًا ملموشًا لطفلك عبر الإنترنت ووصلك؟	Y / N	N → stop
S4	Do you or a household member work in marketing, research, publishing, or children's products? هل تعمل أنت أو أحد أفراد أسرتك في التسويق أو الأبحاث أو النشر أو منتجات الأطفال؟	Y / N	Y → stop

S3 is the one people want to relax. Don't. A parent who has never bought a children's product online cannot tell you what would make them trust an unknown brand's product page – which is half of what the sprint is for.

RECORD – QUOTA VARIABLES, NOT QUALIFIERS

City · Riyadh / Jeddah / Dammam-Khobar / other

Child's age · 4 5 6 7 8 9

Parent role · mother / father / other

Home language · Arabic mostly / both / English mostly / other

Saudi or resident

Most spent at once on a children's book/activity, last year · <25 / 25-49 / 50-99 / 100+ / don't recall

Past spend is a quota variable, **not** a qualifier and **not** a price signal. Screening on it hands you a sample that agrees with your price because you selected for it.

QUOTAS ACROSS THE 12 PARENTS

Variable	Target	Why
City	6 Riyadh, 6 Jeddah	Matches the two-city paid test
Child age	≥7 with a child 5-8; keep 2 at ages 4 or 9	The edges test whether the age claim is too broad
Parent role	≥4 fathers	This research over-recruits mothers, then mistakes it for the market
Home language	≥4 "Arabic mostly", ≥3 "both"	The product is Arabic-first; the sample must be too
Nationality	≥8 citizens, ≥3 residents	Open to every family living in the Kingdom
Past spend	≥3 in the under-SAR-25 bands	Otherwise you only interview people who were always going to say 49 is fine

CHILD SESSIONS – 15

Age spread	3 aged 4 · 4 aged 5 · 4 aged 6-7 · 4 aged 8-9
Gender	Roughly balanced
Prior colouring habit	≥4 children who do NOT colour regularly at home – the ones who already love colouring will enjoy it and tell you nothing

Facilitator's card

30-minute parent interview – what you glance at mid-session

Do not bring: the brand name, a logo, a price, a pitch, or the word "educational".

Silence is a tool. After an answer finishes, wait three full seconds. The honest half arrives in that gap.

Every "nice" gets one follow-up: *what makes it that?* Then stop – twice is interrogation.

1 • The last purchase – 6 min *real behaviour, real occasions, real disappointment*

1. Tell me about the last non-screen activity or toy you bought. **What happened after it arrived?**

حدثني عن آخر نشاط أو لعبة غير إلكترونية اشتريتها. وش صار بعد ما وصلت؟

2. Where did you buy it, and what made you pick that one?

من وين اشتريتها. ووش خلاك تختارها؟

3. Did your child actually use it? How many times?

(?If it stopped – what happened)

4. Was there anything that disappointed you when you saw it in person?

هل فيه شيء خيب ظنك لما شفتها على الطبيعة؟

5. Was there an occasion, or an ordinary day?

2 • The screen tension – 5 min *do NOT say "screens" first*

6. Walk me through a normal weekday afternoon. What is your child doing?

7. Anything you'd like to change about that?

8. :Only if they raise screens themselves
tell me more.

9. When your child says "I'm bored," what actually happens next?

لما يقول طفلك «أنا ملليت»، وش يصير بعدها؟

Counted variable: did they raise screens unprompted? This is the cleanest test of the primary-buyer hypothesis in the whole sprint. If you say the word first, every parent performs concern, because they know it is the socially correct answer.

3 • Worth paying for – 5 min

10. When does a colouring or activity product feel

educational enough

to be worth paying for?

11. And when does one feel like just filler?

12. What makes Saudi-themed children's products feel authentic – or clichéd, or too ceremonial?

4 • The reveal – 7 min

Hand over the prototype. Say nothing. Start the timer. Wait.

Do not narrate, correct, or answer questions with information. Reflect them back: "what would you expect?"

13. What do you think this is, and who is it for?

وش تتوقع هذا الشيء. ولمن؟

14. What would you expect to pay for it?

كم تتوقع سعره؟

15. What would your child do with it – alone, with you, as a gift? What would stop them?

16. Anything here that feels wrong, missing, or not quite right?

فيه شيء يحس غلط أو ناقص؟

17. What do you make of this bit?
(Point at one discovery prompt)

The number in Q14 is only clean once. Say nothing after they answer except "thank you" – no "interesting", no eyebrows. React and it is contaminated for that parent and for the whole price analysis.

5 • Buying it online – 4 min

18. Imagine you saw this online from a brand you've never heard of. What would you need to see before buying?

19. What would make you close the page immediately?

وش يخليك تسكر الصفحة على طول؟

20. Where would you expect to come across something like this?

Q19 is usually more actionable than Q18. This section writes the product page.

6 • Names – 1 min, last, optional

Six candidates on one card, Arabic-first, no logo, no colour.

21. What kind of company does each sound like?

(before saying what yours does)

22. Any you'd

buy from, or that sounds off?

not

Record the negatives. Ignore the preferences. Parents are polite about names and honest about products.

Close

"Is there anything I should have asked you about and didn't?"

«فيه شيء كان المفروض أسأل عنه وما سألت؟»

Then pay the incentive, thank them, and stop talking about the product.

Would a child this age do this alone at home? · yes / with a parent nearby / no

PARENT DEBRIEF – 5 MINUTES

1 · Was that what you expected to see?

2 · Did anything surprise you about how they used it?

3 · Would this hold them for 15 minutes at home, without you?

4 · Having watched that – what would you pay? · SAR

5 · What would you change?

Q4 is a **post-observation** price, and a different number from the interview's unanchored guess. The gap between the two is itself a finding: if watching their own child use it moves the number up, the product page's job is to manufacture that same experience with video.

SAR 2,500 validation line – track it as you spend it

Budgeted: SAR 100-150 per completed parent interview, SAR 100 per child session (paid to the parent). A participant who withdraws is still paid.

[illegible]

Transfer the total to the **Budget Tracker** tab of unit-economics.xlsx. Roughly SAR 11,000 of the pilot buys the evidence; the other SAR 11,000 is only committed after the 30 September gate review. Keeping that split intact is what makes stopping survivable.
